Firearm Registration

J

Risk Assessment

- Public Safety:
 - Risk to public safety is mitigated through licensing - it is not a registration issue.
- Inability to classify firearm based on client information:
 - Additional review of "high risk" firearms before issuing a registration certificate
 - For all others, issue registration certificate with non-confirmed status, flag in system, follow up at a later date
- Ability to physically identify a firearm's uniqueness:
 - Must comply with UN, OAS requirements
 - Method must be developed that respects client needs
